

Machine Learning Madness into Web Applications on **AWS**

Suman **Debnath**
Principal Developer Advocate
Amazon Web Services, India

- **Part 1** (Training the ML model)
 - Brief about Gradient Boosting Algorithm
 - Training a model
 - Save the model artifacts
- **Part 2** (Hosting on AWS)
 - Brief about AWS Elastic Beanstalk
 - Deploy the model via a simple Flask app on Beanstalk

Where we will end up after *30mins* from now ...

Wine Quality Designer

flask-env-winedemo.eba-qxcc3vhp.us-east-1.elasticbeanstalk.com

Wine Quality Predictor

Customize your wine parameters and get real-time quality predictions!

White or Red: 1

Fixed Acidity: 7.5

Volatile Acidity: 0.4

Citric Acid: 0.3

Residual Sugar: 5.5

Chlorides: 0.05

Estimated quality score: Medium (6)

Free Sulfur Dioxide: 31

Total Sulfur Dioxide: 115

Density: 0.99

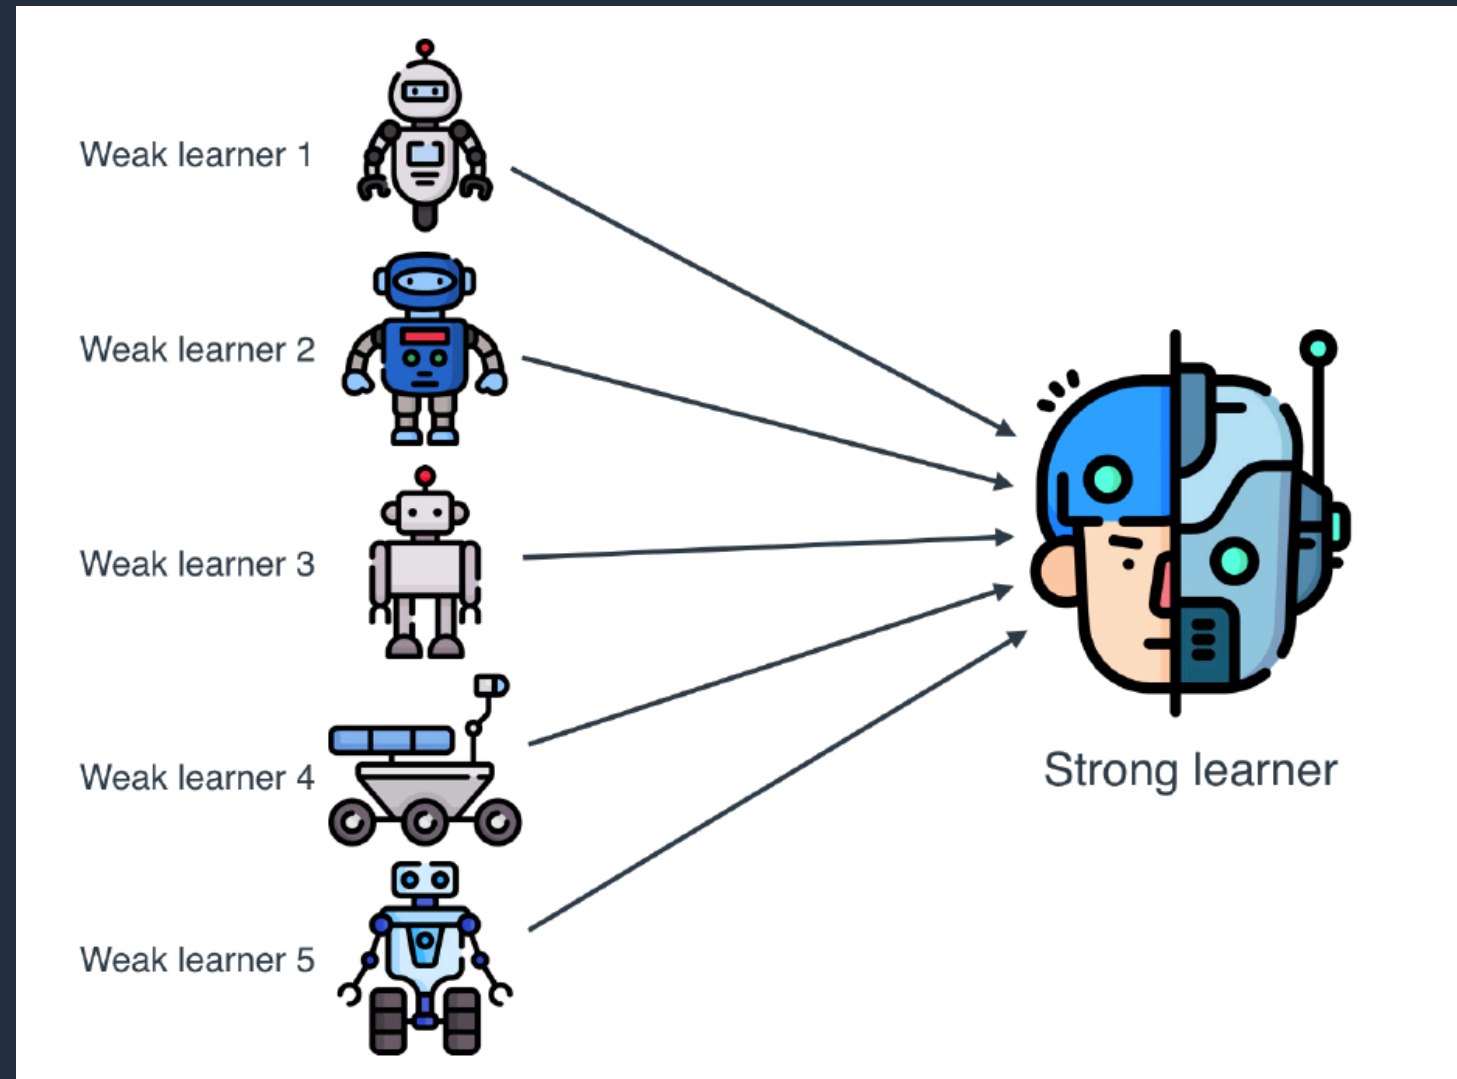

pH: 3.2

Sulphates: 0.5

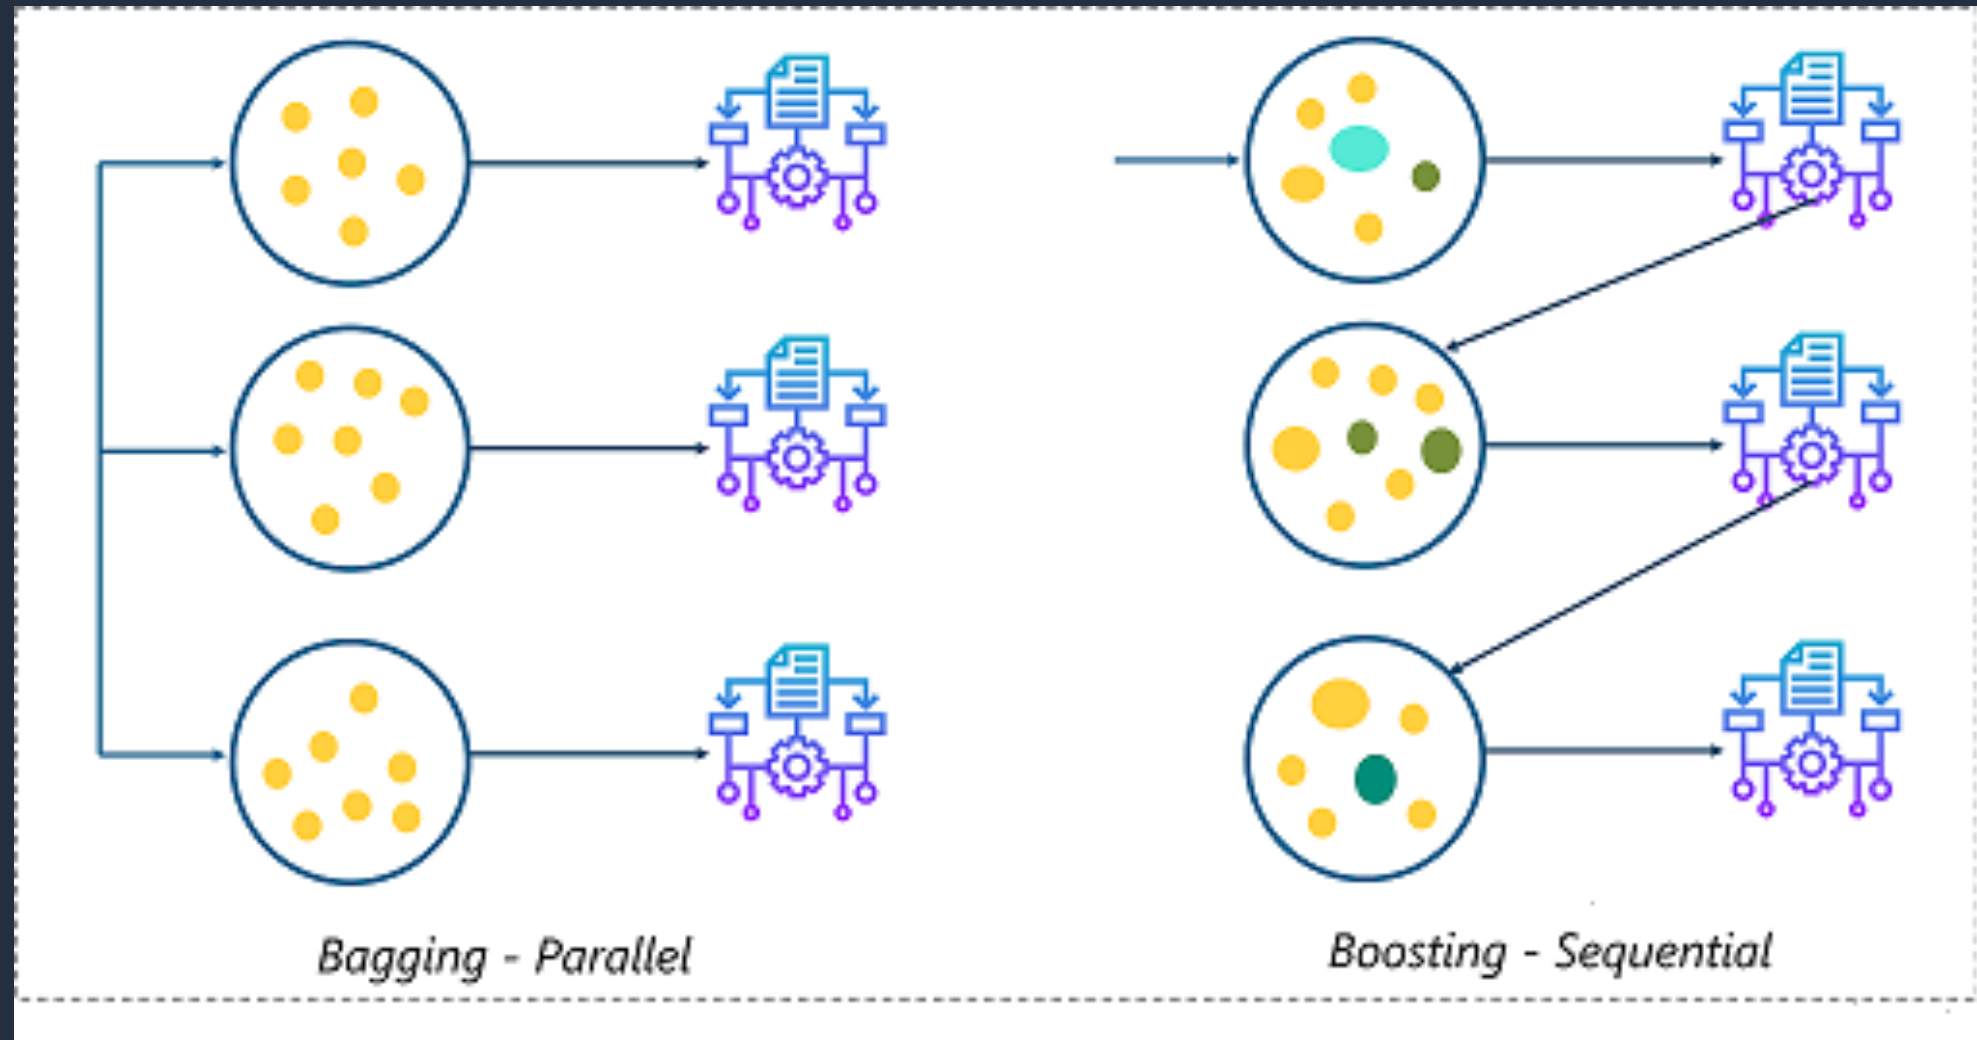

Alcohol: 10.5

Gradient Boosting **Algorithm**

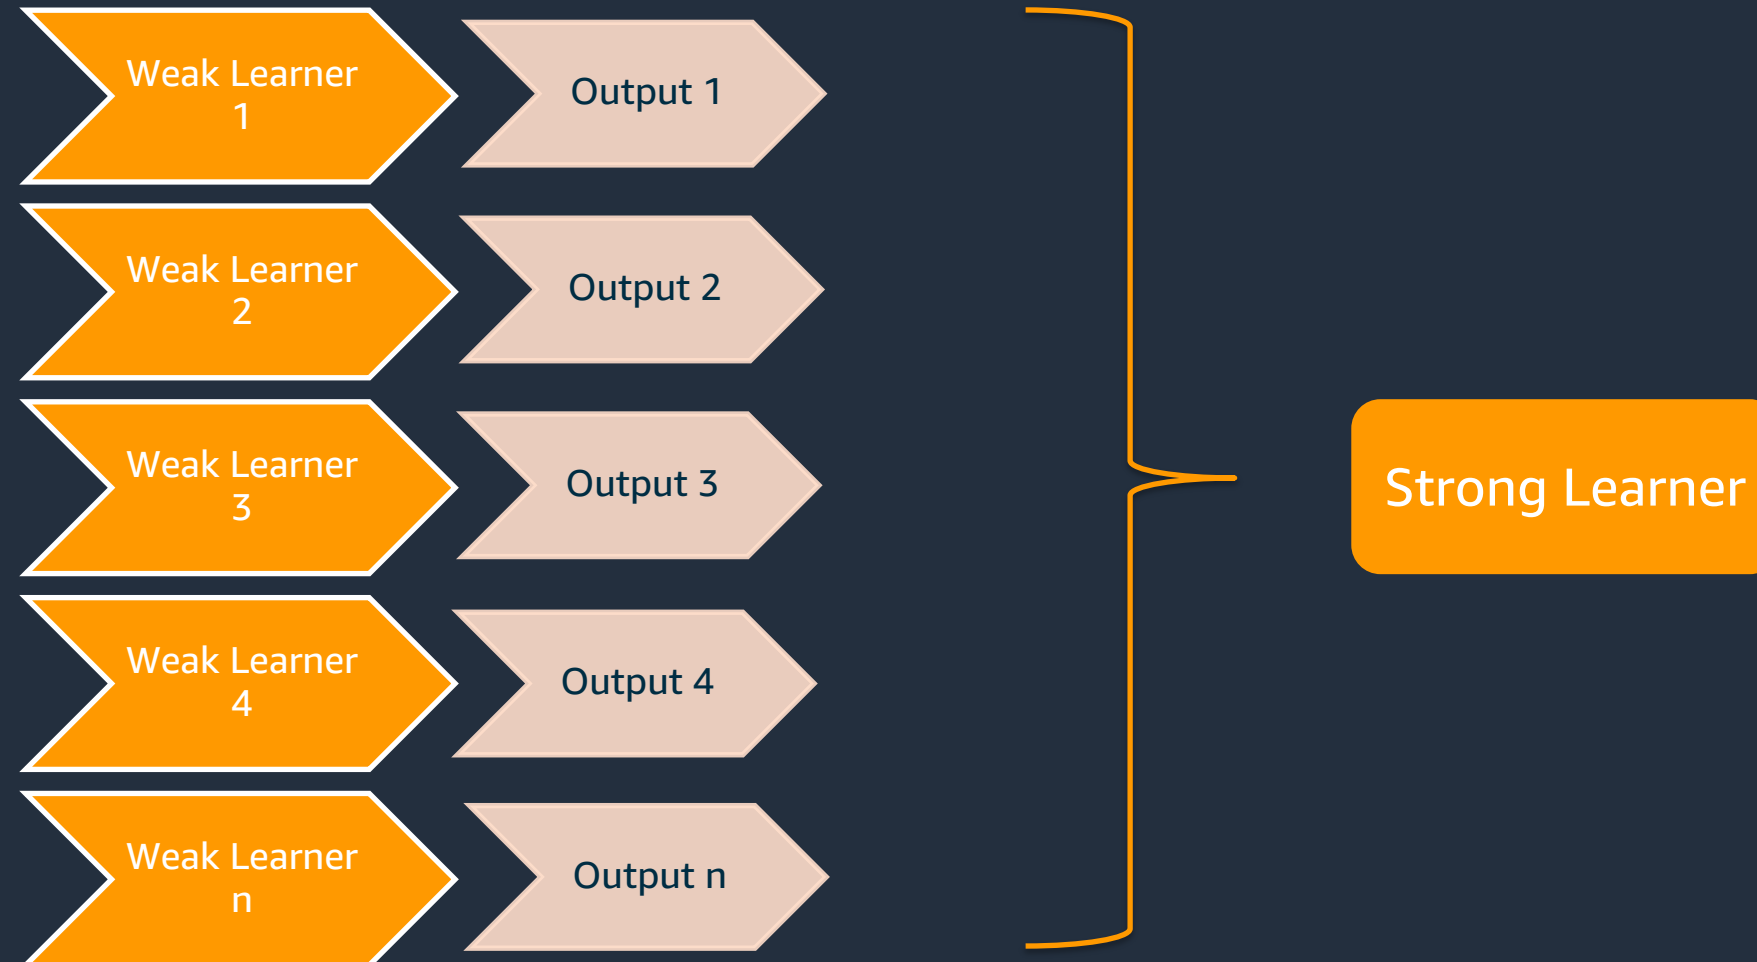

Ensemble Methods

Bagging and Boosting

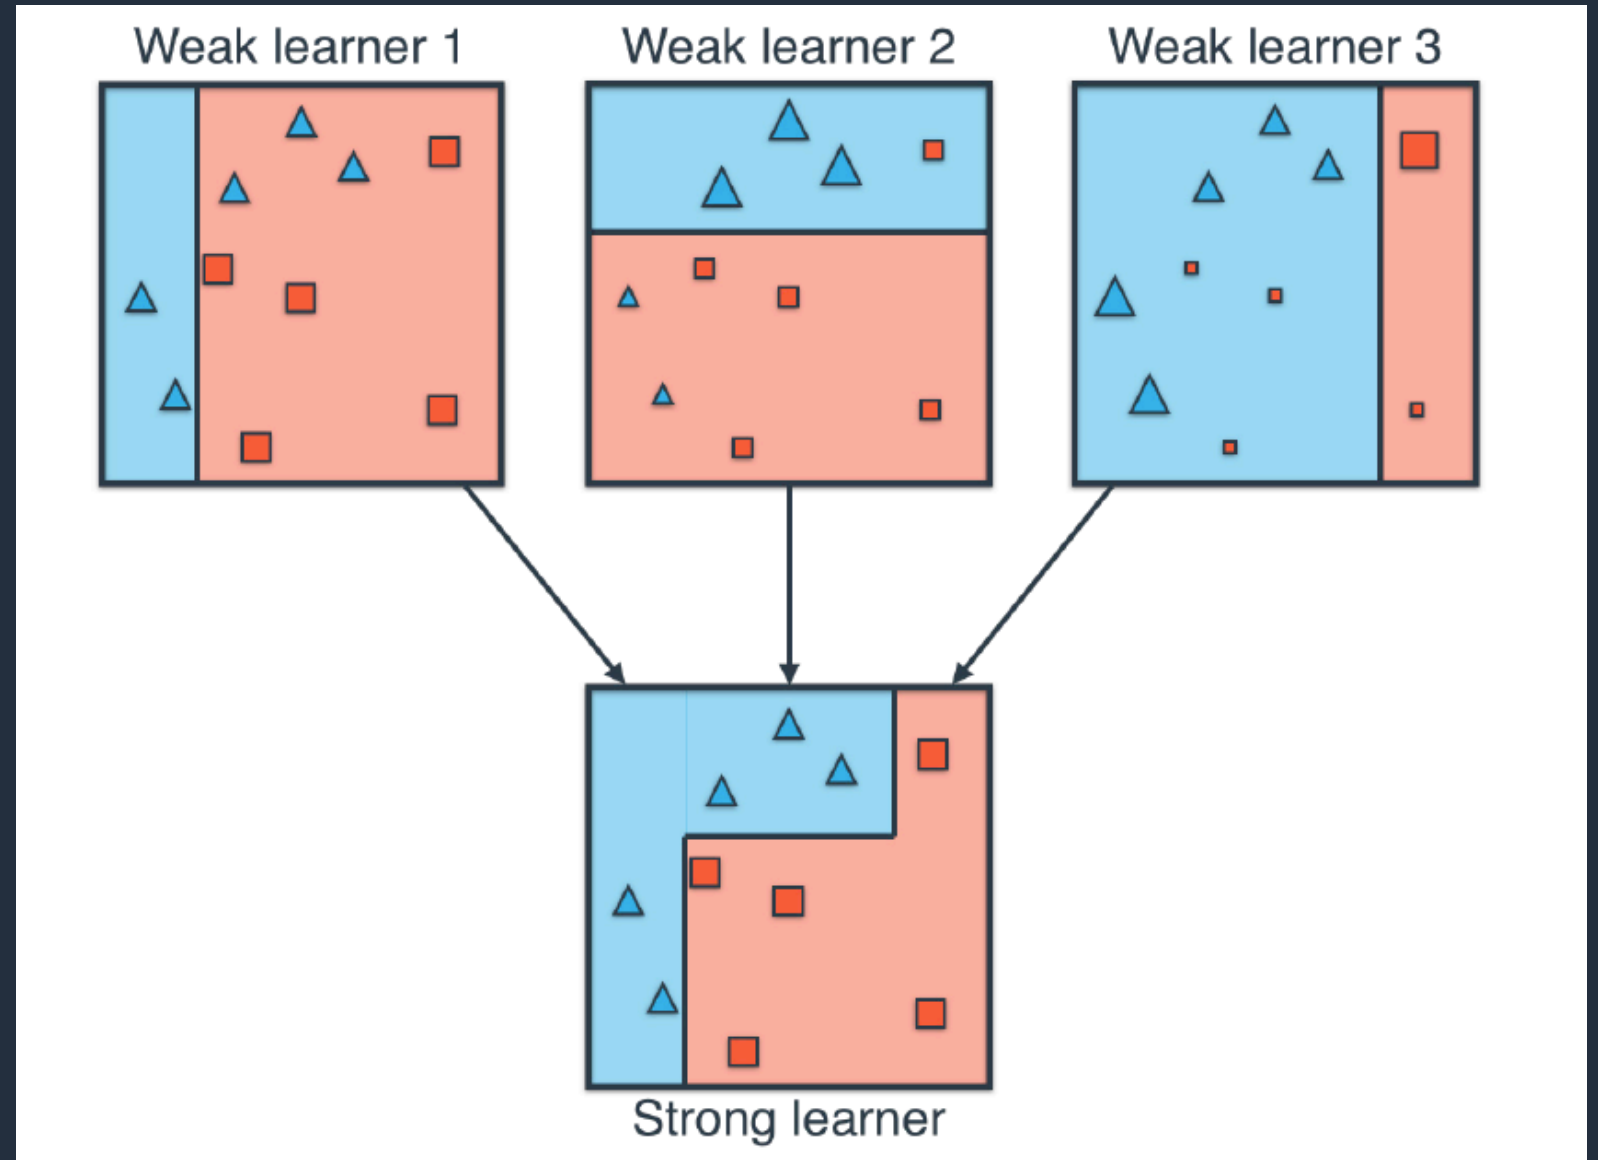

Boosting Algorithm

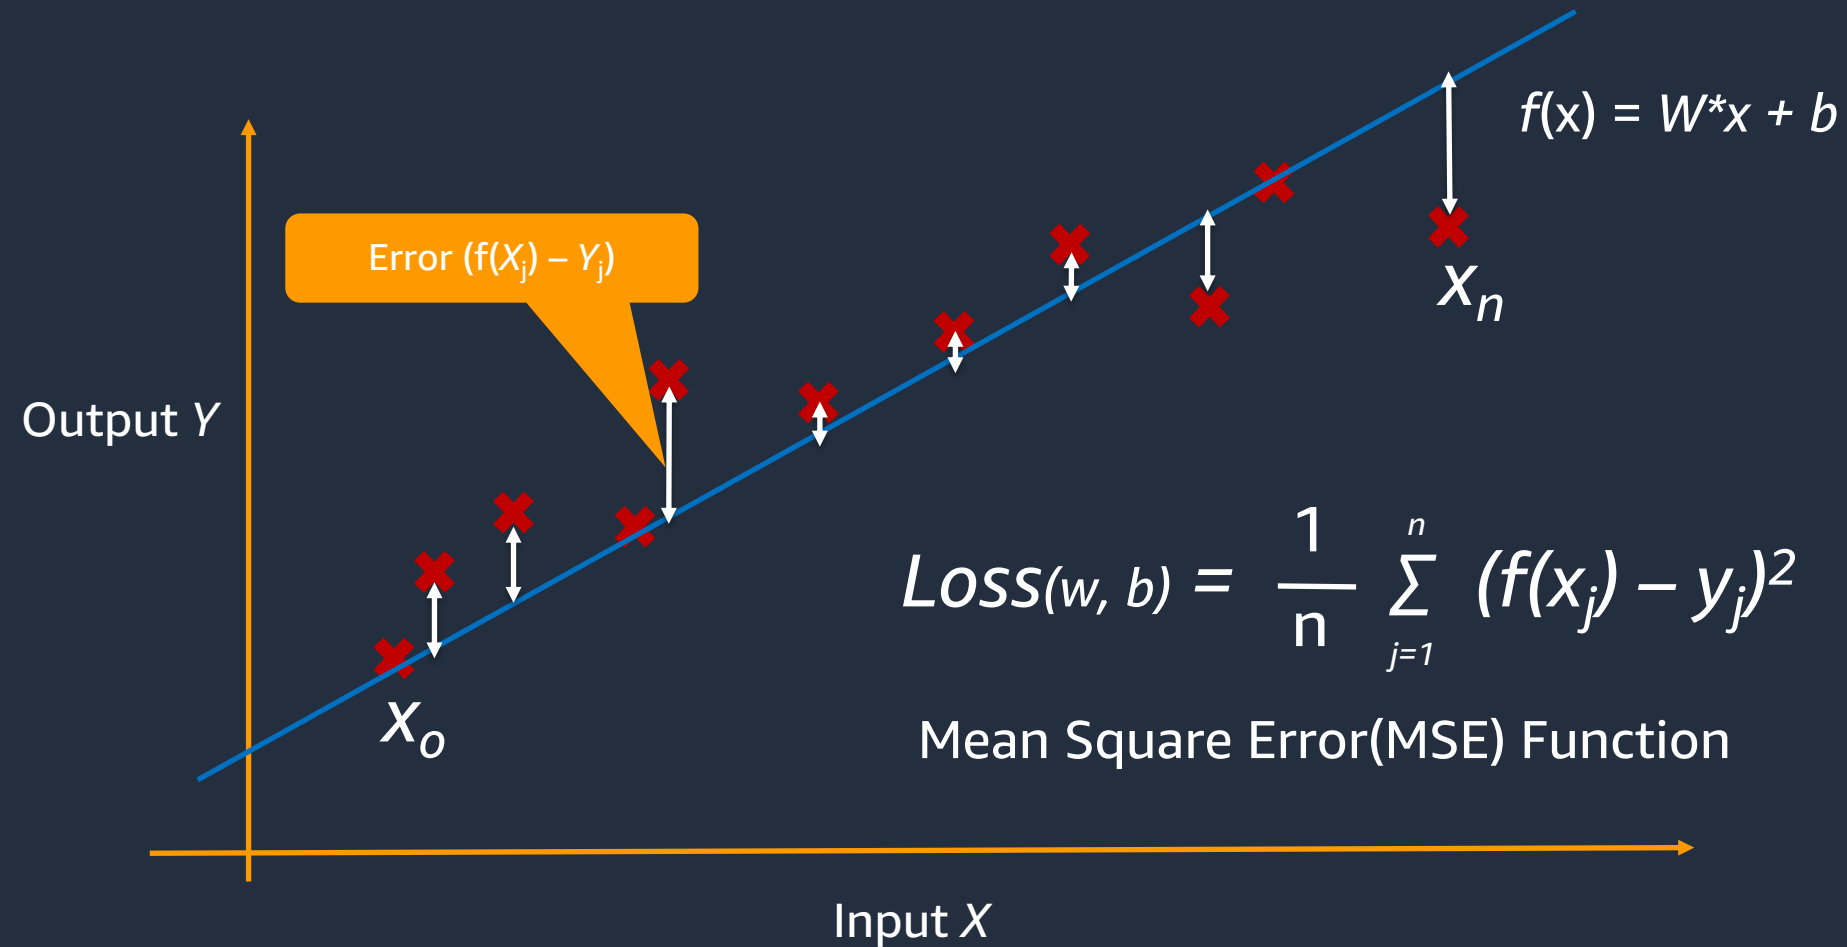

Gradient Boosting

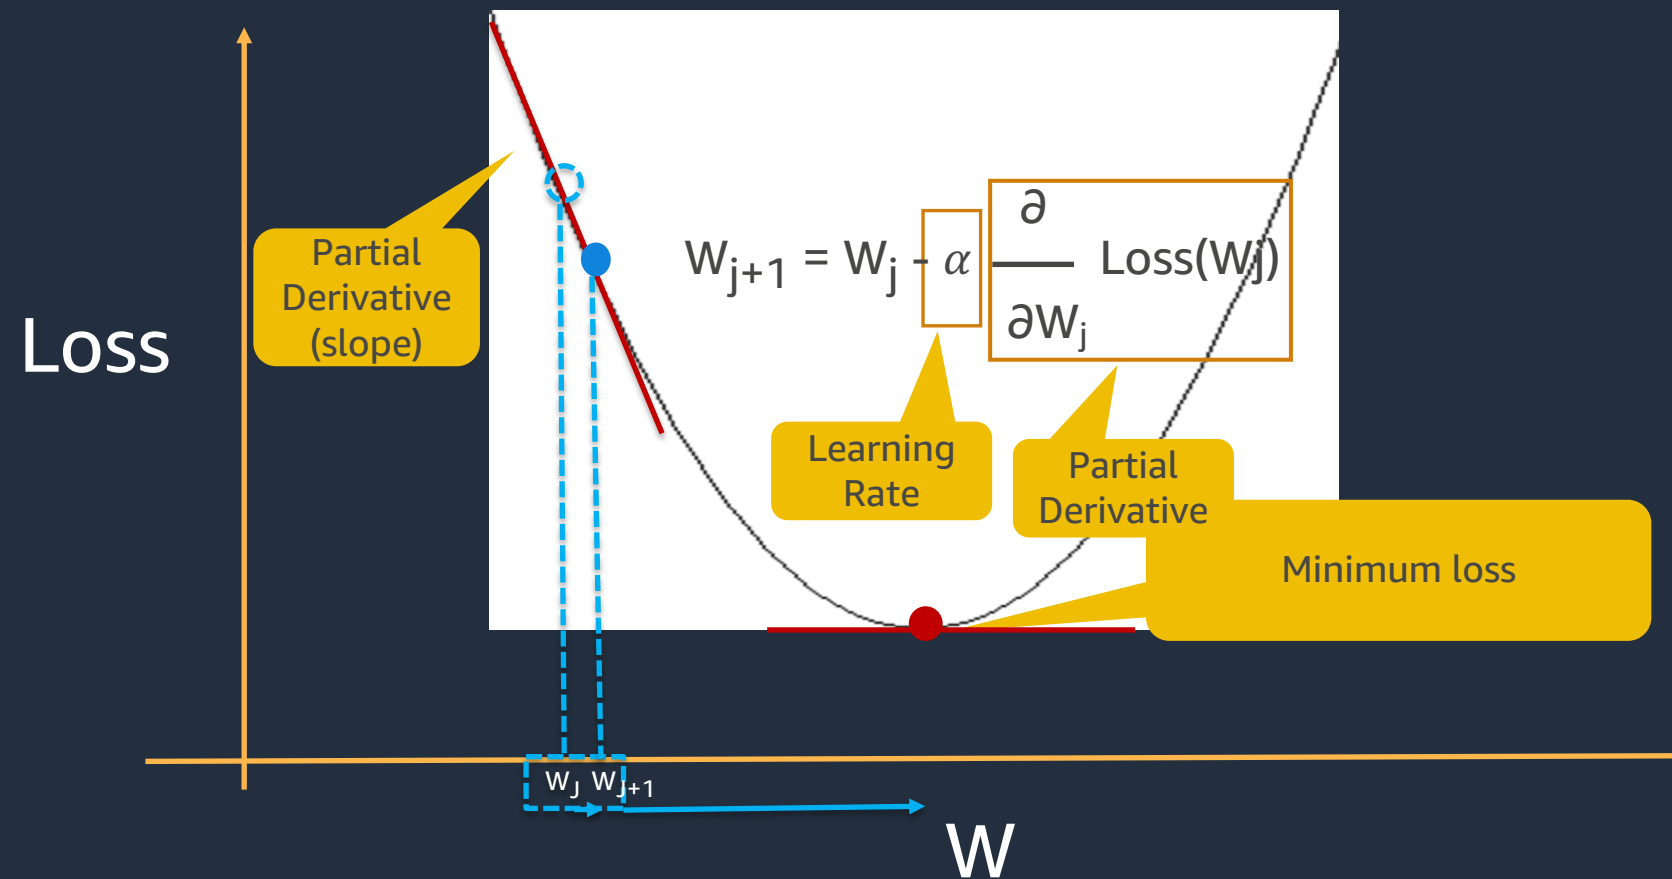

- Each iteration, a weight assigned to each sample
- A weak learner trained on reweighted sample
- Combines the weak classifiers to build a strong classifier

Loss Function

Gradient Descent

XGBoost (eXtreme Gradient Boosting)

- Open-source implementation of gradient-boosted trees algorithm
- Applies gradient boosting to decision tree models in a highly scalable manner
- Robustly handles a variety of data types, relationships, and distributions.
- Provides a large number of hyperparameters—variables that can be tuned to improve model performance

Code please!

AWS Elastic Beanstalk

Running **web applications** on AWS

Running **web applications** on AWS

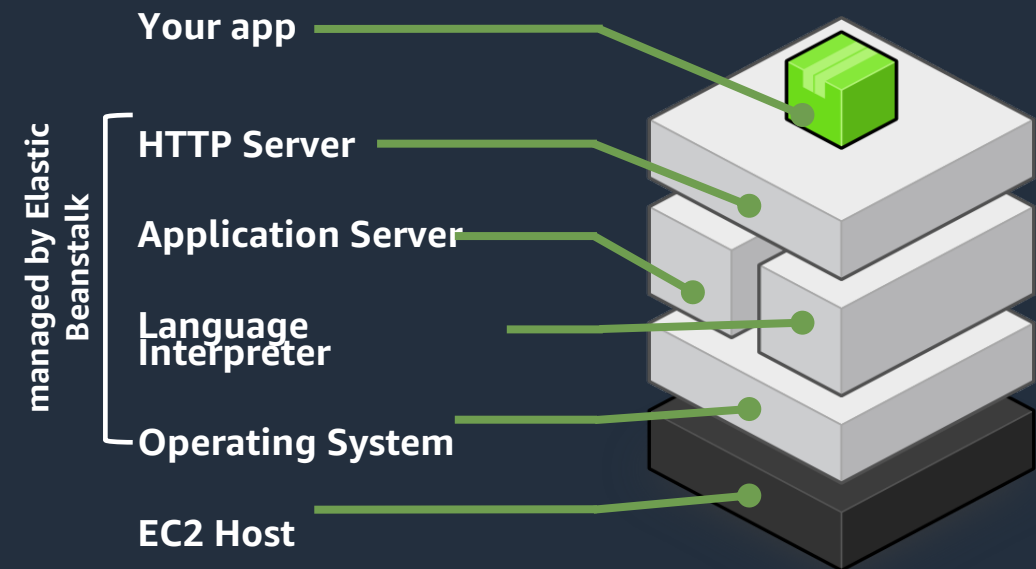

AWS has multiple services that enable you to run your web application including

Compute	• Amazon EC2, AWS Lambda, Amazon ECS, Amazon EKS, AWS Fargate, Lightsail
Storage	• Amazon S3, Amazon EFS
Database	• Amazon RDS, DynamoDB, Aurora
Networking	• Elastic Load Balancing, Amazon VPC
Management Tools	• Application Auto Scaling, AWS CloudFormation, Systems Manager

While each service is powerful and simple to use, running a web application requires that you learn multiple services and leaves the selection, configuration, and management up to you.

Elastic Beanstalk

- Applications run on an Elastic Beanstalk platform
- Ensures all of the components are working seamlessly together

How it **looks** like ...

01

Create your Elastic Beanstalk app

\$ **eb** init

02

Create the resources and launch the application

\$ **eb** create

03

Deploy updates

\$ **eb** deploy

How it looks like ...

```
~/AW/c/pwc2020/eb-flask on master !5  
~/AW/c/pwc2020/eb-flask on master !5 eb init -p python-3.7 wine demo --region us-east-1  
Application wine demo has been created.
```

01

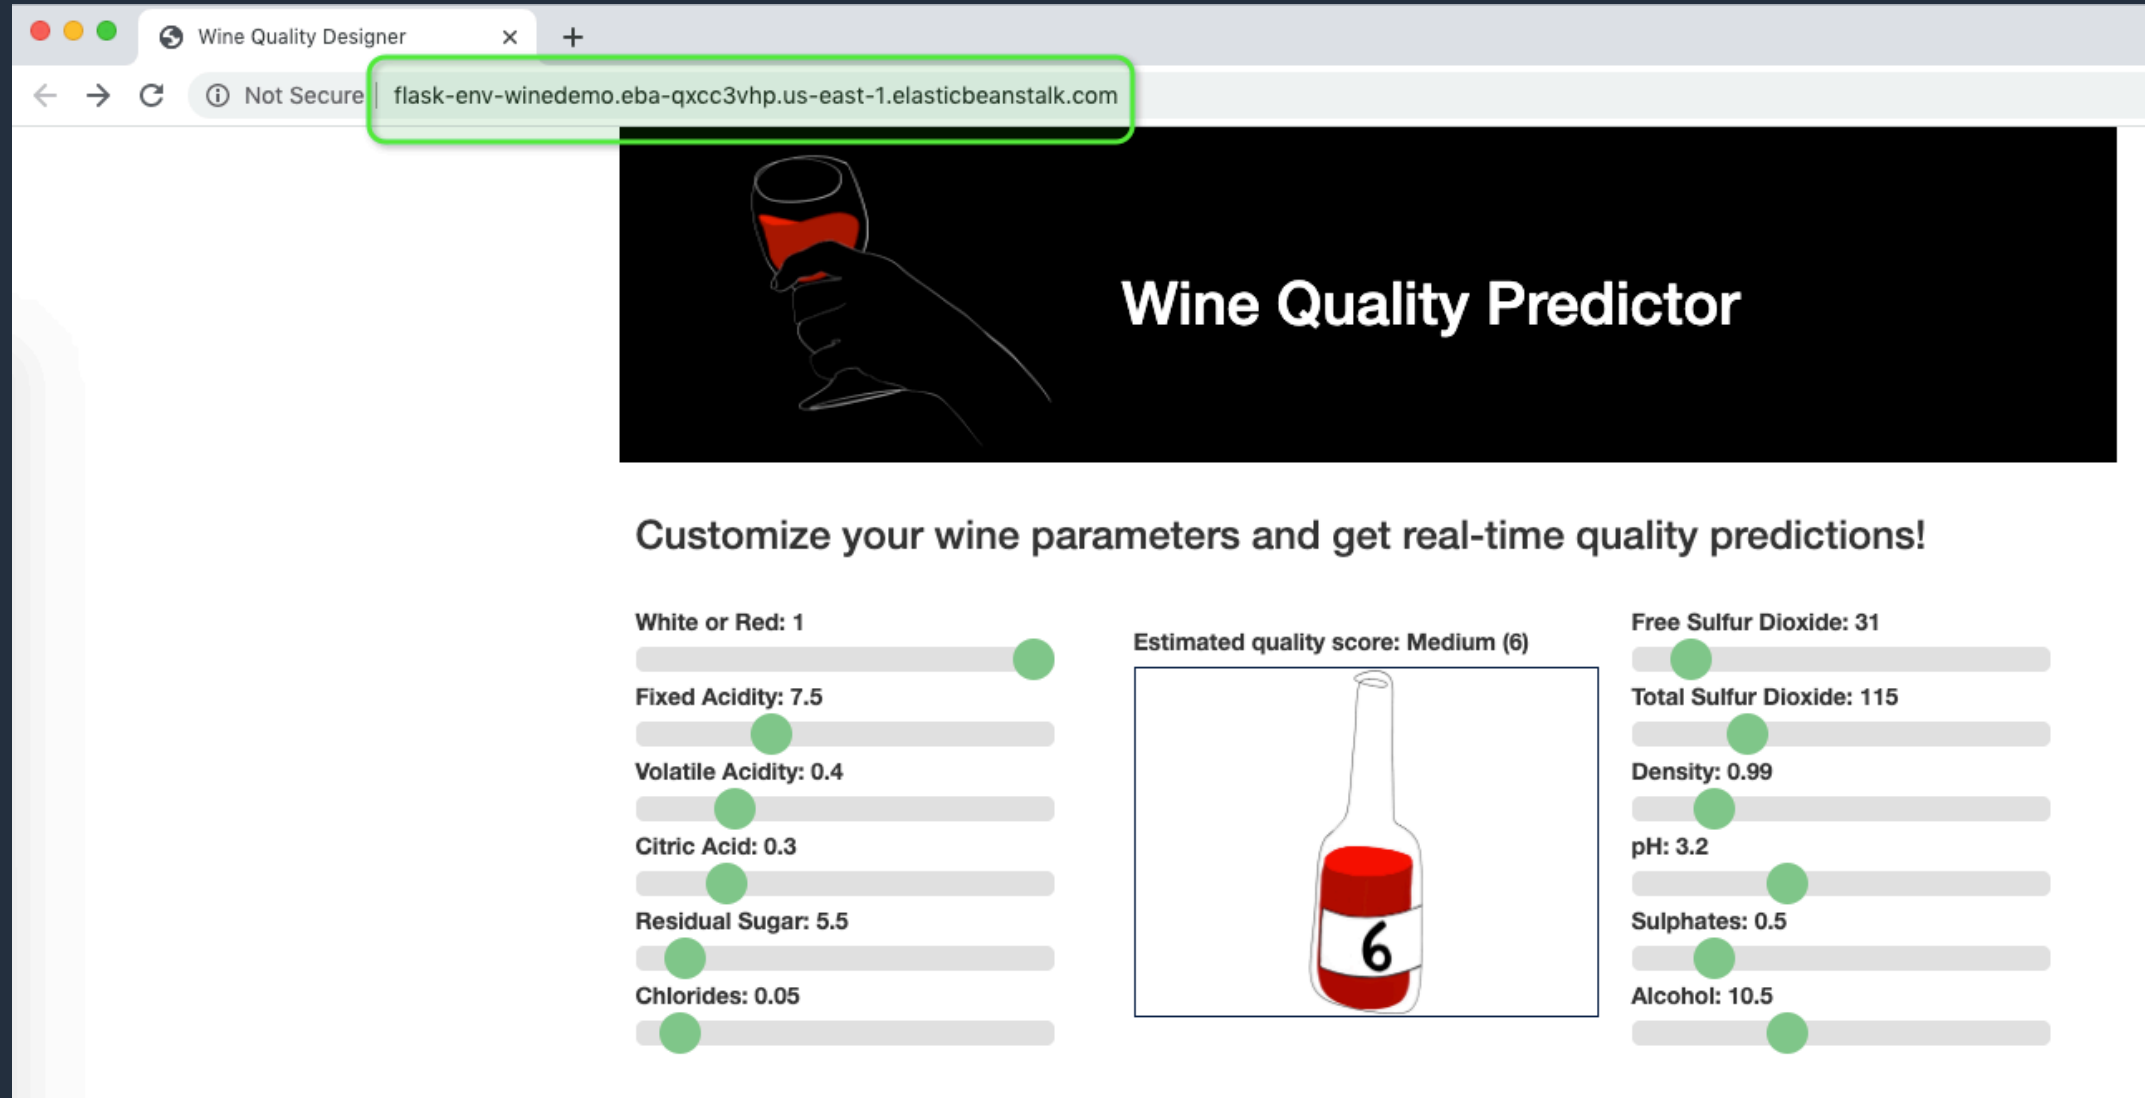

```
~/AW/c/pwc2020/eb-flask on master !5 eb create flask-env-wine demo  
Creating application version archive "app-200619_120439".  
Uploading: [#####] 100% Done...  
Environment details for: flask-env-wine demo  
Application name: wine demo  
Region: us-east-1  
Deployed Version: app-200619_120439  
Environment ID: e-xusiaja6f8  
Platform: arn:aws:elasticbeanstalk:us-east-1::platform/Python 3.7 running on 64bit Amazon Linux 2/3.0.2  
Tier: WebServer-Standard-1.0

After deployment

The screenshot shows a web browser window with the title "Wine Quality Designer". The address bar displays the URL `flask-env-winedemo.eba-qxcc3vhp.us-east-1.elasticbeanstalk.com`, which is highlighted with a green box. The page features a black header with a white line-art illustration of a hand holding a glass of red wine and the text "Wine Quality Predictor". Below the header, a subtitle reads "Customize your wine parameters and get real-time quality predictions!". The main content area contains several sliders for adjusting wine parameters, a central display for the estimated quality score, and a corresponding illustration of a wine bottle.

Wine Quality Predictor

Customize your wine parameters and get real-time quality predictions!

Parameter	Value
White or Red:	1
Fixed Acidity:	7.5
Volatile Acidity:	0.4
Citric Acid:	0.3
Residual Sugar:	5.5
Chlorides:	0.05
Free Sulfur Dioxide:	31
Total Sulfur Dioxide:	115
Density:	0.99
pH:	3.2
Sulphates:	0.5
Alcohol:	10.5

Estimated quality score: Medium (6)

The central display shows a wine bottle with a label featuring the number 6, representing the estimated quality score.

Destroy the environment

```
~/AW/c/pwc2020/eb-flask on master !5 eb terminate
The environment "flask-env-winedemo" and all associated instances will be terminated.
To confirm, type the environment name: flask-env-winedemo
